

# Show-Floor Takeover

Illustrative data

Three-day trade show, 8,000 attendees · \$40,000 placement · Delivered within 24 hours of show close

COMPLETED PLAYS

601

96 seconds of hands-on brand time each, on average

OPTED-IN LEADS

541

90% of plays opted in at the machine

COST PER OPTED-IN LEAD

\$74

34% under the \$112 industry low

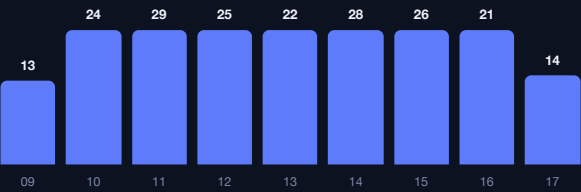

AD-LOOP CONTENT PLAYS

5,430

Logged on the machine, not modelled

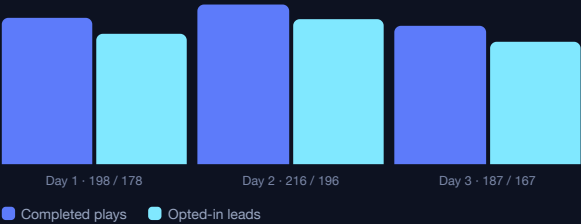

Engagement by hour

Average plays per show hour (show-floor local time) — a 96-second session caps one machine near 37 an hour, so the peak runs close to capacity

Day by day

Leads track plays because opt-in happens at the machine, before play

What arrived with each lead

Opted in at the machine  
Consent captured before play, per badge scan

541

Declared preferences attached  
In-game choices recorded against the lead

489

Played to completion  
Full session with game score attached

522

The screen loop

5,430

content plays across 6 slots and up to 3 screens

Every loop play is logged on the machine, so the count is measured, not modelled from footfall.

Fulfilment, reconciled

374

samples dispensed · 0 stock-outs

Wins dispense a sample; dispenses reconcile against loaded stock at close-out.

Illustrative dataset for a mid-size three-day show at a \$40,000 placement. Live reports carry the sponsor's actuals, delivered within 24 hours of show close. Benchmark: \$112 to \$186 per trade show lead (Exhibit Surveys 2025, ShowHero State of Trade Shows 2026, CEIR blended average).
